

Day 1 Progress – Salesforce Developer Bridge Program

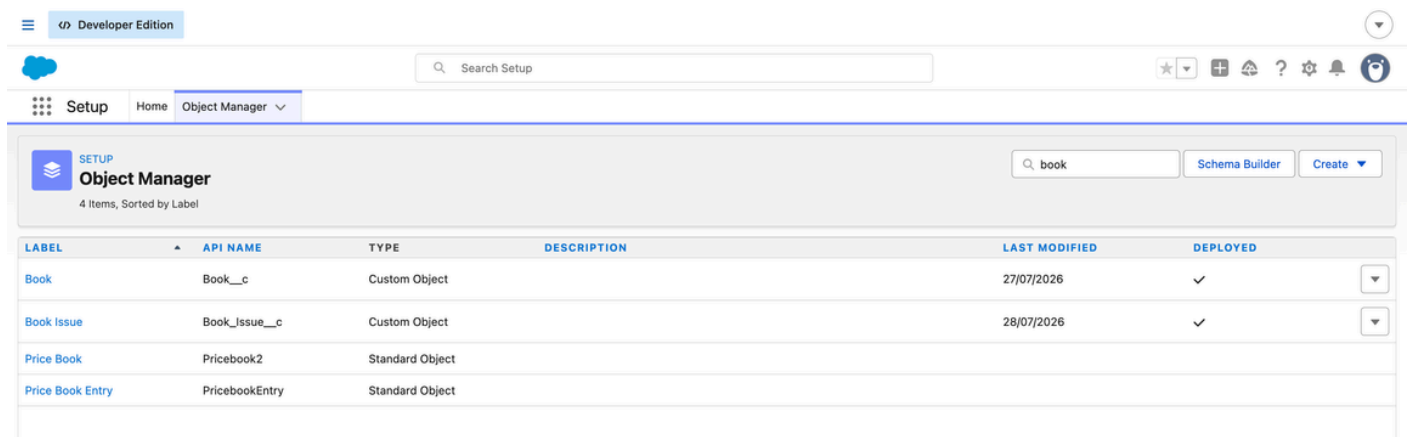

Name : Ajay Ogirala - 23PA1A12F5

Date: 28/07/2026

Task 1 – Custom Data Model

Completed:

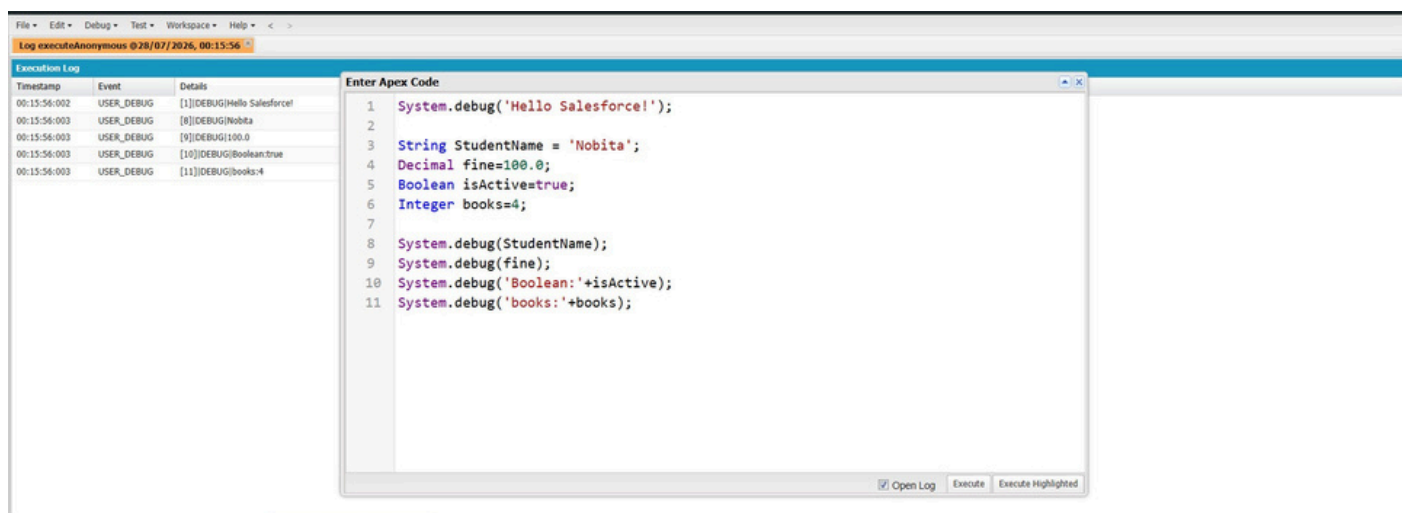

- Created all required custom objects (**Books, Member, Issue Record, and Fine**), added the necessary custom fields, and established relationships between the objects.

The screenshot shows the Salesforce Object Manager interface. The top navigation bar includes 'Developer Edition' and a search bar. The main header shows 'Object Manager' with 4 items, sorted by label. Below this is a table listing the objects:

LABEL	API NAME	TYPE	DESCRIPTION	LAST MODIFIED	DEPLOYED
Book	Book__c	Custom Object		27/07/2026	✓
Book Issue	Book_Issue__c	Custom Object		28/07/2026	✓
Price Book	Pricebook2	Standard Object			
Price Book Entry	PricebookEntry	Standard Object			

Task 2 – Execute Anonymous & Debug Log Practice

The screenshot shows the Salesforce IDE interface. The top menu bar includes 'File', 'Edit', 'Debug', 'Test', 'Workspace', and 'Help'. The main window displays an 'Enter Apex Code' editor with the following code:

```
1 System.debug('Hello Salesforce!');
2
3 String StudentName = 'Nobita';
4 Decimal fine=100.0;
5 Boolean isActive=true;
6 Integer books=4;
7
8 System.debug(StudentName);
9 System.debug(fine);
10 System.debug('Boolean:'+isActive);
11 System.debug('books:'+books);
```

Below the code editor is the 'Execution Log' window, which shows the following log entries:

Timestamp	Event	Details
00:15:56:002	USER_DEBUG	[1]DEBUG Hello Salesforce!
00:15:56:003	USER_DEBUG	[8]DEBUG Nobita
00:15:56:003	USER_DEBUG	[9]DEBUG 100.0
00:15:56:003	USER_DEBUG	[10]DEBUG Boolean:true
00:15:56:003	USER_DEBUG	[11]DEBUG books:4

Task 3 – SOQL Queries

File	Edit	Debug	Test	Workspace	Help	<	>
Book__c@11:26 PM							
SELECT Id, Name, Author__c, ISBN__c, Status__c FROM Book__c							
Query Results - Total Rows: 3							
Id	Name	Author__c	ISBN__c	Status__c			
a00hg00000Ck4BNAAZ	Java Programming	James Gosling	1111	Available			
a00hg00000Ck4svAAB	Python Basics	Guido van Rossum	2222	Available			
a00hg00000Ck5SpAAB	Salesforce Admin	Salesforce	3333	Available

SELECT Name, Fine_Amount__c, Payment_Status__c FROM Fine__c

Query Results - Total Rows: 1

Name	Fine_Amount__c	Payment_Status__c
FINE-0001	100	Pending

task 4 - Write a Real Trigger

files Created

- BookTrigger.trigger
- BookTriggerHandler.trigger

```
1 public class BookTriggerHandler {
2
3     // Prevent duplicate ISBN before inserting books
4     public static void preventDuplicateBooks(List<Book__c> newBooks) {
5
6         Set<String> isbnSet = new Set<String>();
7
8         for(Book__c book : newBooks){
9             if(book.ISBN__c != null){
10                 isbnSet.add(book.ISBN__c);
11             }
12         }
13
14         Map<String, Book__c> existingBooks = new Map<String, Book__c>();
15
16         for(Book__c book : [
17             SELECT Id, ISBN__c
18             FROM Book__c
19             WHERE ISBN__c IN :isbnSet
20         ]){
21             existingBooks.put(book.ISBN__c, book);
22         }
23
24         for(Book__c book : newBooks){
25             if(existingBooks.containsKey(book.ISBN__c)){
26                 book.addError('Duplicate ISBN is not allowed.');
```

```
1 trigger BookIssueTrigger on Book_Issue__c (after update) {
2
3     if(Trigger.isAfter && Trigger.isUpdate){
4
5         BookTriggerHandler.updateBookStatus(Trigger.new);
6
7     }
8
9 }
```

Task 5 – Build One Simple Lightning Web Component (LWC)

Completed:

Developed a simple **Lightning Web Component (bookList)** to display records from the **Books** custom object.

```
File Edit Debug Test Workspace Help < >
BookTriggerHandler.apxc BookTrigger.apxt BookIssueTrigger.apxt
Code Coverage: None API Version: 67 Go To

1 trigger BookTrigger on Book__c (before insert) {
2 |
3 |     if (Trigger.isBefore && Trigger.isInsert) {
4 |         BookTriggerHandler.preventDuplicateBooks(Trigger.new);
5 |     }
6 |
7 | }
8 |
9 }
```

LibraryManagement

availableBooks.html JS availableBooks.js availableBooks.js-meta.xml

```
force-app > main > default > lwc > availableBooks > availableBooks.js-meta.xml > LightningComponentBundle
1 <?xml version="1.0" encoding="UTF-8"?>
2 <LightningComponentBundle xmlns="http://soap.sforce.com/2006/04/metadata">
3   <apiVersion>66.0</apiVersion>
4   <isExposed>true</isExposed>
5
6   <targets>
7     <target>lightning__AppPage</target>
8     <target>lightning__HomePage</target>
9     <target>lightning__RecordPage</target>
10  </targets>
11 </LightningComponentBundle>
```
